Profile Links

GeeksForGeeks

LeetCode

Achievements

Solved more than 700+ problems across different platforms.
Ranked 12 in geeks for geeks out of 2000 from college for Data Structure and algorithm
5* on HackerRank in c++.

Projects

E-commerce Website (Link)

- We have created an e-commerce website with a clean user interface that can be used to shop in the browser. We have also implemented features like add to cart and filter the product according to the price
- We have started by creating the HTML layout first that defines the structure of the website, make it look good by styling using CSS and then write the logic for all the functions in JavaScript using React.

SORTING-VISUALIZER (Link)

Sorting Visualizer is a web app for visualizing a bunch of different sorting algorithms Like Selection Sort, Bubble Sort etc. The App has the functionality to control the speed and size of the array. Tech Stack : HTML,CSS,JAVASCRIPT

Smart City App

This app is one Stop Solution for Travellers who spends most of their time in other countries or in different cities. This app contains all the information related to a particular city. it Utilizes Reactjs, Nodejs, Expressjs, and MongoDB.

Weather App

Developed a web application using HTML, css, JavaScript, React. Is Responsive and Fast. It shows accurate minimum, maximum and current temperature of a place after typing its name in the search box

Search Movie Review-App

This website totally based on Reactjs, where user can search review or rating of any movie. It fetches data through API and shows a result

Student Performance Card Management System Using Oops

In this project I used the concepts of object oriented programming where teachers can keep track of all the necessary details of students and students can see their academic details

Certificate

- HackerRank Problem Solving (Basic)
- HackerRank Problem Solving (Intermediate)
- Juniper Networks Certified Associate, Junos (JNCIA-Junos)
- Speak English Professionally
- Data Structures
